OBJECTIVE

Aspiring Cybersecurity Specialist & System Administrator with a strong foundation in Linux environments and network security. Currently pursuing DKM Level 4 in Computer System Administration with a focus on cyber attack simulation and server defense. **Seeking a 4-month internship (starting July 2026)** to apply technical skills in vulnerability analysis and network configuration within a professional IT environment.

EDUCATIONAL BACKGROUND

Melaka International College of Science and Technology (MICOST)

- *Malaysian Skills Diploma (DKM) Level 4 – Computer System Administration (January 2026 – present)*
- *Malaysia Skills Certificate (SKM) Level 3 – Computer System Operation (June 2024 – June 2025)*

Cyber Academy | (2024 – 2025)

- Advanced Training – Cybersecurity

SMK Sungai Rambai | (2019 – 2024)

- *Sijil Pelajaran Malaysia (SPM)*

WORKING EXPERIENCE

Service Crew & Content Creator | (Jun 2025 – September 2025) Terbang Tinggi Cafe – Malacca, Malaysia

*Operated as a barista, managing high-volume beverage preparation and ensuring premium quality service.

- Produced engaging promotional content for the cafe, including food photography, video editing, and social media marketing.
- Managed floor operations and customer service to maintain a positive dining environment.

Storekeeper | (APRIL 2024 – JUNE 2024) 99 Speedmart – Malacca, Malaysia

*Managed inventory receiving, stock replenishment, and organized warehouse storage for efficient retrieval.

- Monitored stock levels and conducted regular inventory audits to minimize discrepancies.
- Ensured the storefront was consistently well-stocked and maintained a clean, organized retail environment.

Self-Employed Barista (Micro-Business) | (FEBRUARY 2024 – March 2024) Street-Side Coffee Venture – Malacca, Malaysia

*Founded and managed a mobile coffee stall, overseeing the entire business lifecycle from procurement to sales.

- Developed a signature menu of barista-style coffee, focusing on quality ingredients and affordable pricing.
- Managed daily financial records and customer relationship management to build a loyal local customer base.

Part-Time Housekeeping | (2024 – Present)

*The Duyong Dream – Malacca, Malaysia

- Managed daily room maintenance and ensured high standards of cleanliness and hygiene for guests.
- Demonstrated strong time-management skills by balancing academic responsibilities with part-time work.
- Maintained inventory of cleaning supplies and reported maintenance issues to ensure property quality.

PROJECTS

Assessing Server Defense Against Cyber Threats (Final Year Project)

Kali Linux, Proxmox, Ubuntu Server, Network Security Tools, Wireshark, Wifite

- Designed and implemented a virtualized lab environment using **Proxmox** to simulate real-world cyber attack scenarios and server defense strategies.
- Conducted extensive **vulnerability analysis** and **penetration testing** using tools like **Nmap**, **WhatWeb**, and **John the Ripper** to identify system weaknesses.
- Performed **network traffic analysis** and packet sniffing using **Wireshark** to monitor and mitigate unauthorized access attempts.
- Developed a comprehensive **Incident Response Plan** and security mitigation strategies to ensure server availability and data integrity during DDoS and privilege escalation attacks.
- Evaluated and deployed server-side defenses, including firewall configurations and user permission management, to harden the system against exploitation.

DDoS Stress Tester & Security Tools (Personal Project)

Python, Linux * Developed a Python-based script for stress testing network bandwidth and understanding mitigation techniques.

- Created automated reporting tools for platform security awareness.
- Engineered a network stress testing script to evaluate bandwidth capacity and analyze the impact of high-traffic volume on server stability.
- Utilized the tool to study mitigation techniques such as rate limiting and traffic filtering in a controlled environment.

WhatsApp Security Reporting Simulator (Personal Project) *Python,*

Cybersecurity Training Logic

- Designed and developed a specialized tool for cybersecurity training as part of the "Cyber Attack and Server Defense" coursework.
- Simulated the reporting process of suspicious activities to help users understand the logic behind server defense and security mitigation.
- Implemented academic-focused ethical hacking scenarios to demonstrate the importance of rapid threat reporting in a controlled environment.

SKILLS

- **Operating Systems:** Linux (Kali Linux, Ubuntu, Debian), Windows Server (Basic).
- **Cybersecurity:** Vulnerability Analysis, Penetration Testing (Basic), Reconnaissance & Scanning, Network Security.
- **System Administration:** User & Permission Management, Package Management, Network Configuration, Server Setup.
- **Programming:** Python (Tool development & Scripting), HTML/CSS (Web Hosting/Portfolio).
- **Languages:** Bahasa Melayu (Native), English (Upper-Intermediate B2).

CERTIFICATIONS

- Malaysia Skills Certificate (SKM) Level 3 - Computer System Operation
- Introduction to Information Security
- Ethical Hacking
- Cyber Security
- Internet Of Things
- Cloud Computing
- Software Testing
- AI Fluency
- AI Safety
- Generative AI
- Classical Cryptography for Beginner
- Cyber Safe

AWARDS & ACHIEVEMENTS

Anugerah Khas Yayasan Melaka | 2025

Graduan Terbaik TVET MICOSTSKILLS

- Recognized for outstanding academic performance and exceptional technical skills in Computer System Operations.
- Awarded for demonstrating leadership and excellence in practical TVET training.
